

MARKET **RESEARCH**

**BRAND EQUITY AND CONSUMER
PURCHASE DECISION**

INTRODUCTION

Objective: Understand Brand Equity's Impact

Goal: Understand Purchase Behavior Drivers

Assess: Brand Awareness and Loyalty

Analyze: Perceived Quality and Value

Factors Considered: Gender, Age, Location, Qualification and Income

RESEARCH METHODOLOGY

- Utilized questionnaire via the Google Form platform
- Used Likert Scale for detailed responses
- Sampling type as Convenience
- Used Social Media for broader participant engagement
- Analyzed using statistical software for robust insights

DATA ANALYSIS (1/2)

- Reliability Test:

Significance Value= 0.860

- Validity Test:

Significance Value= 0.000

- Normality Test:

Significance Test= MALE: 0.007

FEMALE: 0.082

- Homogeneity Test:

Significance Value= 0.853

DATA ANALYSIS (2/2)

- Mann Whitney Test
 - Gender: Significance value= 0.025
- Kruskal's Wallis Test
 - Age: Significance value= 0.000
 - Qualification: Significance value= 0.000
 - Location: Significance value= 0.065
 - Income: Significance value= 0.002

MANAGERIAL IMPLICATION

- Gender impacts brand perception: Men favor brands
- Age influences brand preference: Younger favor brands
- Location doesn't affect brand preference
- Higher education favors brands
